The Hiring Manager
ACT Logistics, Queensland

Subject: Application for ICT Project Role

Dear Hiring Manager,

I am excited to apply for the ICT Project role at ACT Logistics. As a recent Computer Science graduate from Curtin University, I am eager to contribute my technical expertise and problem-solving skills to a company that values innovation and efficiency in logistics technology. My strong work ethic, persistence, and leadership qualities make me an asset to any team, and I am confident in my ability to drive positive outcomes within your organization.

Throughout my academic journey, I have embraced challenges with dedication and resilience. My experience in developing a full-stack Twitter clone using React and MongoDB, as well as a Single Case Visualize mobile application using Flutter, showcases my ability to design, develop, and implement technology solutions that meet real-world needs. These projects demanded not only technical proficiency but also a deep commitment to collaboration, adaptability, and attention to detail.

I am particularly drawn to ACT Logistics because of its dynamic and fast-paced environment, where technology plays a critical role in ensuring efficiency and reliability. My problem-solving mindset and ability to remain calm under pressure allow me to tackle challenges head-on, ensuring projects are completed efficiently and effectively. Additionally, my experience implementing predictive modeling pipelines and barcode detection systems demonstrates my analytical skills and innovative approach to optimizing operations.

Beyond my software development skills, I possess a keen interest in and practical experience with hardware. I have consistently taken the initiative to troubleshoot and repair various hardware components, including laptops, CPUs, and PlayStation consoles. This hands-on experience has provided me with a deeper understanding of how hardware and software interact, and I am eager to apply this knowledge to ICT projects at ACT Logistics.

Beyond my technical capabilities, I take great pride in being an honest, kind, and helpful team player. I believe in fostering positive relationships, supporting my colleagues, and stepping into leadership roles when needed. My internship at BCI Central honed my ability to analyze user feedback and optimize UI components, strengthening my ability to translate user needs into effective technological solutions.

Employing me means gaining a dedicated and results-driven professional who is eager to contribute, learn, and grow within your team. My commitment to efficiency, reliability, and

continuous improvement aligns seamlessly with ACT Logistics' mission. I am fully prepared to relocate to Queensland and look forward to the opportunity to discuss how my skills and values can benefit your organization.

Thank you for your time and consideration. I have attached my resume for your review and look forward to hearing from you soon.

Sincerely,
Baibhav Shrestha (Bob)
